8. Acknowledgements

It is now the end of my PhD, and I still remember the first day when I arrived in the Netherlands. In the last four and a half years, I have experienced a lot of things, excitement and disappointment, and met a lot of people, good and bad. I want to thank everyone I have met in the last four and a half years. Everything means a lot to me.

First of all, I want to thank my supervisor, Prof. Dr. Amina Helmi, who gave me the chance to study in such a wonderful group and work with wonderful people. It is really a great honour to work in your group. During the four and a half years, you gave me full support to attend courses, workshops and conferences, taught me a lot during each meeting and encouraged me to present my results. During the last few months, you significantly helped me with my thesis, without which I could not have finished it. I will not forget each of your suggestions. They are not only important regarding science, but are also very important to my life. You showed me the way in which a successful scientist should be.

Dr Martin Smith, you are a special person to me. Four and a half years ago, you interviewed me about my application for the PhD position, and now you are one member of my thesis reading committee. Before I came to Groningen, you also gave me a lot of information about Amina's group. Thanks very much!

Many thanks to my thesis reading committee, Prof. Heather Morrison, Prof. Eline Tolstoy and Prof. Martin Smith, who gave me useful comments and suggestions about my thesis.

Robyn, I must say you are one of the most important people to me in the last few years. Thank you very much for your help which means quite a lot, especially at the beginning of my PhD. I enjoyed every discussion with you, and thank you very much for being so patient and allowing me to present my results and ideas.

Maarten, maybe you are one of the people I admire the most. During my PhD you taught me quite a lot, not only the knowledge of astronomy, math and programming languages, but also the right way to do science. I learnt a lot from you! Thank you very much!

Jovan, many thanks for revising parts of my thesis and making some plots for me. Also

many thanks for teaching me a lot about PYTHON. I will not forget your words, *"The most important thing is that you are learning something"*.

Shoko, you are always willing to listen to me and encourage me. You are one of the best people I have met! Thanks, my friend!

Hans, many thanks for your help during my PhD, especially for helping me translate my summary in Dutch. In my mind, you are a perfect man, and always doing things beautifully! I still remember that every time before you showed your results during the group meetings, you would write quite a lot of equations, most of which made me lost!

Davide, Lorenzo, Jorrit, Helmer, Carlos, Teresa and Giacomo, you are always willing to help me. Thank you very much for your help and useful discussions.

I also want to thank my officemates, Veronica and Khan. It was very cool to meet you two. Every chat with you was enjoyable.

I want to specially thank Lucia, Christa and Martine. Every time I went to your office with troubles or questions, you were so kind and always helped me solve them. I also want to thank the PBC members, who gave me quite a lot of useful suggestions. Also many thanks to all the secretaries and the computer group, who fully supported my work and made things smooth, and without whom I could not get the results of my thesis.

Many many thanks to my master supervisor Prof. Biwei Jiang, who lead me to astronomy research and has always been encouraging during my PhD. Thank you very much for your full support. I also want to thank Shuang Gao, Ming Yang, Jundan Nie, Chen Jiang, Jiaming Liu for your help and suggestions. Especially Jiaming, every time I came back to BNU, you always kindly helped me. I will not forget that. Many thanks.

My sincere thanks to Tim Beers, who generously shared his work. Thank you very much for the useful discussions. You showed me another interesting direction of astronomy.

Wenting, even though we met only once, you helped me a lot regarding the Aquarius stellar halo dataset. Thanks very much. I hope you are enjoying your time in Japan.

Ming, you are a really good friend. Thanks for your foods, they are quite delicious. I am looking forward to seeing you again. Zheng, Yanan and Liang, many thanks for making my time in the Netherlands so great! Also many thanks to Yang, Yufan, Qian, Jianjun and Qiubin, every weekend with you is the best moment for me. I enjoyed the time with you! Shuo Cao, my friend, thanks for your great help during my application of my PhD. I am looking forward to meeting you again and playing badminton with you.

感谢我的父母对我毫无保留的支持、理解和鼓励，长久以来不能照顾和陪伴你们，是我最大的亏欠。感谢我的表妹张冬奇在学业繁重之时为我设计和创作了封面和封底。特别感谢我的好朋友吴小敏、刘春男和王伟在我遇到各种问题时给我提供的帮助！

At last I want to thank one of my respectable teachers, Zhiliang Yang, who died on 30th October 2016. I benefited a lot from your courses and suggestions. Thanks!
